

# Plot/Scan Management Software

## PlotBase|3

### Managing Large Format Prints

PLOTBASE|3 is a professional b/w printing solution. Fast, reliable and easy to use. PLOTBASE|3 gives you the maximum from your large format printer, a decade of experience helped build one of the best and fastest b/w rips in the market together with total control of your printing queue.

**FEATURES** - Most Large Format Devices are individually available, External controller uses standard Windows PC as plot server, Client/Server workflow, Accounting data, Machine Condition Alerts, Job Status Alerts, Scanning Application, Raster editor included with Scanning Application, Pre-print thumbnail viewer of all compatible formats, Web based job submission client with Apache Web Server, Windows, AutoCAD ADI/HDI, Macintosh, Unix/FTP job submission clients.

#### SUPPORTED FILE FORMATS

HPGL 1 and 2 - Calcomp 906/907 - TIFF group 2, 3,4 , BMP - PCX - T6X - HPRTL - Multipage TIFF

## ScanBase|3

### Complete Digital Archives

Full input-management system for todays high performance scanners. Optimized for large format b/w and grayscale images including an incredibly fast editor for post scan processing of images. SCANBASE|3 can interact with all RATIO print products becoming a powerful copy solution.

**FEATURES** - Large format optimized editor • Scan-to-file, Scan-to-pdf / multipage-pdf, Scan-to-tiff / multipage-tiff, Scan-to-archive, Scan-to-copy • Processing saved images • Adjust Free rotation • Cropping • B/W inverting • Binary conversion of greyscale • Scaling • x/y mirroring • Deletion of selected rectangles • Multi stamping • Set processing

## ArcBase|5

### Easy Archiving of Wide Format Documents

The modern architecture of ARCBASE|5 is both, easy to use as well as powerfull in terms of functionality. Storage, search and retrieval of documents has never been this easy.

#### ARCBASE|5 HIGHLIGHTS

**EASE OF USE** - Bring wide format documents to archive simply by pressing a button. No need to type in extra index information or key words. With its automatic text recognition and auto index system ARCBASE|5 is taking care about your documents.

**NEW VIEWING CONCEPT** - high speed preview, screen optimized images are used. This fastview shows even big drawings almost immediatly in a browser without the need of plug-ins or extra software.

**PLATFORM INDEPENDENT** - ARCBASE|5 is fully Web controlled the system can be used and administrated via intranet and internet from virtually any pc with any operating system.

#### ARCBASE|5 FEATURES

Fully Web Enabled - Flexible Importing of Files - Quick Search  
Fast Viewing - Convenient Output - Easy Web Management

## PlotBase|PM

### Total Output Control

PLOTBASE|PM is a plot management and cost control software made for multiple wide format b/w and colour output devices. The focus of PLOTBASE|PM is to increase productivity, speed up internal processes, reduce output costs and save labour expenses. Thanks to the use of the latest technologies and innovative functionalities, PLOTBASE|PM is today the preferred solution for productive printing environments.

PLOTBASE|PM addresses the market of architects, engineers, contractors, manufacturers and all companies with the need to print wide format drawings.

A wide range of client applications are available to connect all types of Windows applications and operating systems to PLOTBASE|PM.

CAD Environments, PLM or PDM Systems can be easily adapted either via special drivers or through special settings or interfaces.

Intuitive Output Control with 3-D GUI it serves the admin with an intuitive view on all plot jobs

## PlotBase|PM HIGHLIGHTS

### Analyze & Calculate your Printing Costs

PLOTBASE|PM offers real time consumption and supplies monitoring and automatically links costs to users, accounts and projects.

### Streamline your Printing Workflow

PLOTBASE|PM offers one consistent workflow no matter what kind of document is printed or which output device is used.

### Secure Document Transmission

PLOTBASE|PM provides secure Web enabled document submission and printing right out of the box.

### Manage your Printing Devices

PLOTBASE|PM manages all b&w and color printing devices no matter what brand.

### Print on Demand Document Storage

With the print on demand STORAGE OPTION of PLOTBASE|PM, ready to print documents can be managed and stored centrally.

### Color Management & Central RIP

PLOTBASE|PM connects all printing devices to one central RIP application to guaranty best possible quality on any connected printer.

# Plot/Scan Management Software

## CAD|STATION

CAD|STATION is a software solution for Canon printers. It adds engineering file format support and job tracking to Canon wide format devices. Furthermore different Canon printers can be combined to one virtual multi roll plotter increasing speed and making the Canon printers more versatile.

CAD|STATION is a turnkey solution working right out of the box.

<p><b>All native file formats</b> All native engineering file formats for your Canon printers TIFF, HPGL, DWF, PS*, PDF*, DWG*, DXF*</p>	<p><b>Supported Canon Printers</b> Supports the Canon imagePROGRAF 500, 600, 610, 700, 710, 720, 810, 820, W6400 &amp; W8400</p>
<p><b>Postscript Support</b> Native Adobe Postscript and PDF printing*</p>	<p><b>Automatic error handling</b> In case of engine problem the system automatically prints to another plotter.</p>
<p><b>AutoDesk Support</b> Native Autodesk DWG and DXF printing*</p>	<p><b>Invoice and Delivery Notes</b> Create invoices and delivery notes based on individual prices lists</p>
<p><b>Virtual Multi Roll Printer</b> Combine up to 3 Canon printers to one Virtual Multi-Roll Printer</p>	<p><b>Job Tracking</b> Get full Job Tracking and Accounting for your Canon printer</p>
<p><b>Split Jobs</b> Increase Speed and split your jobs to up to 3 CANON printers</p>	<p><b>Print from Remote</b> Print from remote locations to your CANON engines</p>

## CAD|STATION Clients

### PLOTCLIENT|SET

A number of documents can be combined to create a set and provide for affecting output settings such as copy count, output device, media size, color depth, etc. PLOTCLIENT|SET is available for clients using Windows PCs.

### WINPRINT

The Windows Printer Driver (WINPRINT) integrates like a standard printer driver into Windows operating systems. With WINPRINT documents can be sent from of any Windows application to CAD|STATION.

### PLOTCLIENT|HDI

Drawings can be sent directly out of Autodesk applications such as AutoCAD or Autodesk Mechanical. This client fully integrates into Autodesk applications and provides further output settings such as copy count, output device and account settings. Additionally, PLOTCLIENT|HDI can automatically use PLOTCLIENT|SET for set creation.

### PLOTCLIENT|WEB

A server based application offering platform independent access to the CAD|STATION system. Users connect with a standard Web Browser via Intranet or Internet to put drawings together to create a print set and to set the output information such as copy count, output device and account settings.

## CAD|STATION Accounting

CAD|STATION Accounting Client offers you the easiest and most convenient way to generate invoices and delivery notes for the print/copy services directly out of your CAD|STATION solution. Simply open the Accounting Client in your web browser and select the desired time period, the account, project or cost center as well as the corresponding price list to receive invoices and delivery notes as PDF at the click of a button.

For each job, CAD|STATION sends the following information to the Accounting Client:

- Activity (Print, Scan, Copy)
- Color or B/W Media
- Account, project and cost center information

## CAD|STATION|SCAN

CAD|STATION|SCAN is the user friendly SCAN module that upgrades CAD|STATION to a fast virtual multi-roll copier. Simply add CAD|STATION SCAN and a Context scanner to your CAD|STATION and get a high speed MFP solution.

Thanks to its easy-to-use and touchscreen compatible interface, CAD|STATION|SCAN offers the best solution for easy and convenient high quality color copying.

### Print from anywhere to B/W and Colour

Multiple Print Tools are available to connect to Mac, PC and Unix and enable the users to watch and control their print queue.

### E-Mail any parts, any section

Scan to E-Mail any document in Colour, B/W or crop a section of any drawing all through an easy to use touchscreen interface

### Scan once, Copy many

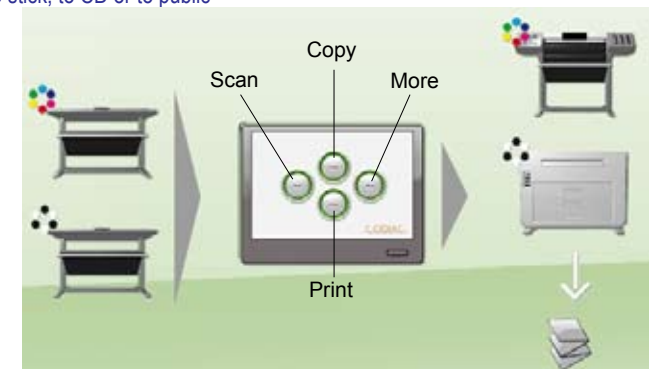

Preview your document, select B&W or colour, multiple copies and scaling options

### Internet Printing

IP based printing allows printing from virtually anywhere

### Scan and Store

Scan to print, to file, to USB stick, to CD or to public disk

Easy to use TouchScreen Controls
