

Caldera Graphics is an award winning software company, with 17 years of experience in imaging technologies, specializing in driving solutions for large format peripherals worldwide. Caldera's suite of production oriented Print and Print-to-Cut workflow solutions, offer colour management, imaging and driving solutions for large and grand format peripherals. Each application has its own unique features specific to the graphic art market needs and reside on the powerful and proven genuine Caldera technology.

CopyRip is a powerful and easy to use desktop RIP solution which delivers all the features you need to print professionally.

Discover Caldera's intuitive interface, super fast preflight and pre-view features. CopyRip enables you to quickly crop, rotate, resize and colour enhance the document before printing. Whether used for processing PostScript, PDF or raster files, CopyRip delivers high quality output with its powerful ICC compliant RIP engine.

CopyRip also includes **Step & Repeat** and **Nest-O-Matik™** features that will automatically optimize your media usage. With it's **Super Spooler**, you get "live" control and simultaneous access to your files in process, on any driven printer. Stop, release, reorder, change the number of copies of any job in real time, on your workstation or using a remote web browser.

CopyScan is a complete and simple solution for reproducing high quality documents. File-to-print, Scan-to-Print and Scan-to-File with ease and precision.

CopyShop is the powerful combination of CopyRip and CopyScan, delivering all the combined features you need to RIP (PS + PDF + HPGL), print, scan and convert files professionally.

ONYX helps you improve your bottom line results by reducing printing costs and increasing productivity. ONYX develops and markets commercial printing software and solutions for the digital colour printing marketplace. By combining colour science, image processing and print production knowledge, ONYX delivers powerful, reliable printing workflow solutions.

Maximum Productivity
Multiple Printer Environment - medium to high volume

- Print with Aqueous, solvent or UV inks.
- Profile you own media
- Colour proof across devices
- Run 4 active printers and 2 RIPs simultaneously
- White ink capabilities

Two Printers in a Production Environment
Two Printers in a Production Environment - Low to medium volume

- Print with Aqueous, solvent or UV inks.
- Preflight and general colour correction tools
- Contour cutting
- Run 2 active printers

One Printer in a Production Environment
Low volume

- Print with Aqueous, solvent or UV inks.
- Pantone library
- Run 1 printers with preflight

RIP's

Wasatch SoftRIP gives you the perfect combination of easy operation and sophisticated features. New users will be up and running in minutes. Printing experts will find the intricate controls and innovative tools necessary to implement even the most complex production and colour workflows for unparalleled quality output. Whatever your printing goals, you will succeed with SoftRIP.

Wasatch SoftRIP includes drivers for popular large and small format inkjet printers. SoftRIP is so simple to set up and easy to learn that you might forget it has the most powerful colour and workflow tools in the RIP Printing industry.

Tools for Every Level of Expertise

With easy color controls almost anyone can begin printing accurate colour with a minimum of training. Beginners get great colour out of the box with fully plug-and-play imaging configurations and fast setup. Then, when you're ready to dig deeper into your colour control Wasatch has you covered with sophisticated colour tools for colour management experts.

A New Standard in Color Quality

SoftRIP is the RIP that colour experts choose most. The exclusive Precision Stochastic Screens Halftone Method achieves excellent colour reproduction with perfectly smooth gradients.

Leverage the Power Across Your Network

Any PC or Mac on your network can use SoftRIP to print using a regular web browser. SoftRIP's server tools are simple to setup on networked workstations and even easier to use.

Additional SoftRIP Features

| | |
|--------------------------------|-------------------------|
| Cost Estimator | Tiling |
| Smart Nesting | 16bit Rendering |
| Spot Colour Replacement | ICC Profile View |

Wasatch SoftRIP SP

Printing color separations via inkjet saves you time and money while increasing your flexibility to meet customer demands.

Small Format & Desktop Editions

If you're using a small format printer for digital photography, separations, or proofing output, you need a high quality RIP.
